REPETE'S WISDOM OF THE WEEK

What you should know about your green waste service!

Over the past few month contamination has become a serious issue in the residential green waste carts. Majority of the contamination has been from trash and construction debris.

If items are found contaminating your cart, the driver will tag the cart and it will not be emptied until the contaminating items have been removed. If the contaminating items are not removed an additional fee will be charged for the extra trip to dump the cart as trash.

What goes in your Green Waste Cart:

- Grass clippings
- Brush
- Shrubbery Pruning
- Tree Trimmings
- Twigs & Small Branches
- Weeds & Leaves.

What does not go in your Green Waste Cart:

- Palm Fronds/ Palm Tree Parts
- Cactus or other succulents
- Animal Waste
- Food Waste
- Soil or Dirt
- Gravel or Sand
- Plastic Bags
- Construction Materials
- Trash

Do not put green waste in plastic bags. Place the green waste directly into the container.

Important Service Information

Green Waste carts are emptied once per week along with the trash and recycling. If you are new resident, please contact the service provider to verify your collection day.

Containers **MUST** be placed at the curb by 5:30 AM the day of collection to ensure service. Between collection days residents are encouraged to store carts on their property, either in garages or behind fences.

For more information regarding proper green waste disposal, please contact your service provider:

Administration

What is Emergency Preparedness? Emergency preparedness means taking action to be ready for emergencies before they happen. The concept of emergency preparedness encompasses actions aimed at enhancing safety and stability when an emergency occurs, such as an earthquake, hazardous material spill, or wildfire. Think of it as insurance. A person may have car insurance, homeowners insurance and health insurance. While these are not items that are used every day, they are there for a reason; to provide a safety net and make life easier in the times that they are needed. Emergency preparation is just another form of insurance.

During a disaster or emergency, many systems you rely on may not function as well as they usually do. Familiar landmarks, bridges and roads may be altered or closed. Utilities like electricity, water, gas and phone service may be disrupted. In a situation like this, it will be easy for no one. However, those that have a stocked emergency kit and a well thought out plan ahead of time will have an easier time dealing with the situation compared to those that have taken no time to prepare at all. The time to get prepared is NOW. Remember, a disaster or emergency can happen at any time. In the meantime, check out www.ready.gov for more information on getting prepared today.
